DARSHAN TANDEL

Software Engineer | DevOps & CI/CD | React, Next.js, Docker, GitHub Actions | AI, RAG & LLM

Valsad, Gujarat, India | +91 6356718644 | tandeldarshan57@gmail.com

LinkedIn: linkedin.com/in/darshantandel002 | **GitHub:** github.com/darshan30072

PROFESSIONAL SUMMARY

Software Engineer with hands-on DevOps experience designing CI/CD pipelines, Docker containerization, automated Git-triggered deployments, and secure network infrastructure (Nginx, SSL/TLS, Cloudflare Tunnel, UFW), alongside full-stack development in React.js, Next.js, PHP, and WordPress. Skilled in GitHub Actions, self-hosted runners, and Linux server administration, with a track record of debugging complex production pipelines. Uses GitHub Copilot in VS Code daily to speed up development and improve code quality, and builds local LLM / Retrieval-Augmented Generation (RAG) systems with real-time streaming.

TECHNICAL SKILLS

DevOps & Infrastructure: Docker, Docker Compose, GitHub Actions (CI/CD), Nginx, Cloudflare Tunnel, SSL/TLS (Let's Encrypt), UFW, Linux (Ubuntu), Bash, Self-Hosted Runners, systemd, Git/GitOps, Cloud Storage (Cloudinary, S3)

Frontend & Backend: JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Node.js, ASP.NET Core, PHP, WordPress, REST APIs, MySQL, MongoDB

AI-Assisted Development & LLM Engineering: GitHub Copilot (VS Code), Ollama (Local LLM Deployment), Retrieval-Augmented Generation (RAG), Vercel AI SDK, Vector Embeddings

Tools & Automation: Git, GitHub, Python (Data Automation, API Data Pipelines)

PROFESSIONAL EXPERIENCE

DevOps & CI/CD Engineer

Self-Employed — Valsad, Gujarat, India | **Jun 2026 – Present**

- Designed and implemented automated GitHub Actions CI/CD workflows utilizing self-hosted Linux runners for multi-service production environments.
- Containerized full-stack stacks (Node.js, Next.js, MongoDB) using Docker & Docker Compose, ensuring consistent, reproducible deployment environments.
- Debugged and resolved complex pipeline build issues, including npm cache bottlenecks, cross-platform lockfile conflicts, and runner time synchronization/clock drift issues.
- Configured secure network infrastructure and zero-exposed-port server setups using Cloudflare Tunnel, Nginx reverse proxy, SSL/TLS certificates (Let's Encrypt), and UFW firewall rules.
- Automated lint-gated testing and continuous delivery pipelines to Vercel and Linux VMs to enforce code quality and zero-downtime releases.

Frontend Developer (Intern → Trainee → Associate Engineer)

Wappzo Infotech Private Limited — Navsari, Gujarat, India | **Nov 2024 – Dec 2025**

- Built 10+ reusable React.js components using Hooks and props-driven design, integrating with REST APIs to render dynamic data; resolved frontend-backend data-format mismatches.
- Translated UI requirements into responsive, cross-browser interfaces across 10+ pages using React.js, Next.js, and modern CSS (Flexbox, Grid, Tailwind, Bootstrap).
- Built backend features in PHP and MySQL, including server-side logic, optimized database queries, and REST API endpoints, and integrated them with frontend applications.
- Architected and shipped 3+ custom WordPress plugins and a custom theme (pushtimarg.wappzo.com), featuring an English/Hindi translation engine, LMS course module, polling system, and multi-provider OAuth login.
- Mentored 15+ onboarding interns through HTML, CSS, and JavaScript code reviews while delivering core daily engineering tasks.

.NET Developer Intern

Prologiciel Consulting — Valsad, Gujarat, India | **Dec 2023 – Apr 2024**

- Built a full-stack task management app in ASP.NET Core (Razor Pages) and C#, implementing CRUD operations against SQL Server via parameterized ADO.NET queries to prevent SQL injection.

KEY PROJECTS

FOP Admin — Food Ordering Platform Admin Dashboard

Next.js, TypeScript, Docker, GitHub Actions, Nginx, Cloudflare Tunnel, MongoDB, Cloudinary | Live: fop-admin.darshantech.online

- Built a GitHub Actions CI/CD pipeline on self-hosted Linux runners; fixed npm cache, lockfile conflict, and VM clock drift build failures.
- Secured the server with zero exposed ports using Cloudflare Tunnel, Let's Encrypt SSL/TLS (DNS-01), and UFW firewall hardening.
- Containerized Node.js/Express, Next.js, and MongoDB with Docker Compose; moved to native Nginx for zero-downtime routing.

My Portfolio — AI-Powered Personal Website

Next.js, TypeScript, RAG, Ollama, Vercel AI SDK | Live: my-portfolio.darshantech.online

- Shipped a zero-external-cost production RAG pipeline (markdown chunking, local vector embeddings, cosine similarity) powering an AI assistant with self-hosted Ollama LLMs.
- Engineered a streaming chat UI with closed action-token navigation, rate limiting, and sanitized rendering; automated CI/CD to Vercel via GitHub Actions with lint-gated builds.

Pushtimarg Web Application

WordPress, PHP, MySQL, JavaScript, REST APIs | Live: pushtimarg.wappzo.com

- Engineered a scalable WordPress platform featuring 3+ custom plugins, custom theme, English/Hindi translation system, LMS module, and OAuth integrations.

EDUCATION & CERTIFICATION

B.E. in Computer Science — Mahatma Gandhi Institute of Tech. Education, Navsari, India | 2021 – 2024

Diploma in Information Technology — Dr. S. & S. S. Ghandhy College of Engg., Surat, India | 2018 – 2021

Certification: AI Engineer Core Track — LLM Engineering, RAG, QLoRA & Agents, Udemy
